

NAVIGATING NEW HORIZONS OUR EXCITING ADDRESS CHANGE!!

Exciting times ahead!
We're thrilled to announce our move to a new address, a step closer to new opportunities. Please update your records with our new location at Torres Rani, 6th Floor, Avenida Marginal 141, Maputo.

We warmly welcome all clients and friends to visit us in our new space!

COMMUNITY CON- SULTATION MEETING

We're delighted to share that we successfully conducted a community consultation meeting for a groundbreaking solar power project in Namialo, Nampula.

This significant gathering marked the official kickoff of solar initiatives in Namialo, setting the stage for a brighter and sustainable future.

NEW PROJECT LANDSCAPE RECOV- ERY PLANS FOR THE MINING CONCESS- IONS!

We're proud to announce that BioVision has been appointed by CIMENTOS DE MOÇAMBIQUE to conduct the Landscape Recovery Plans for the mining concessions of CM and CINAC.

The project includes the topographic survey, the recovery plan and the submission of the process to INAMI.

NEW PROJECT LOBITO MINING TERMINAL PROJECT

Exciting news! BioVision has been entrusted with the pivotal task of preparing the environmental management plan for the Lobito mining terminal in Angola, aligning seamlessly with the esteemed principles of ISO 14001:2015. This appointment reaffirms our commitment to sustainable practices and environmental excellence.

When electronic devices and components are disposed of improperly because they were not recognised as e-waste, they often end up in landfills or incinerators. Electronics contain various hazardous substances such as lead, mercury, cadmium, and flame retardants, which can leach into soil and water sources, polluting ecosystems and posing risks to human health.

WE ARE CELEBRATING E-WASTE DAY!

Embrace the Fall and Green Your Routine!

Plant a tree, swap out disposable for reusable, and let's turn over a new leaf for a greener world.

As the leaves change color and nature undergoes its seasonal transformation, October beckons us to embrace change for a greener world. Planting a tree isn't just about adding beauty to our surroundings; it's a commitment to the environment's health and longevity. Trees act as nature's air purifiers, absorbing carbon dioxide and releasing oxygen. This simple act contributes to cleaner air and helps combat climate change, making our communities healthier and more sustainable.

#FallIntoSustainability

IDEA OF THE MONTH: EMBRACE THE FALL AND GREEN YOUR ROUTINE!

World News

Africa News

- Bull semen: Artificial insemination tanks stolen in County Tyrone: They are thought to have been taken from an outbuilding on Ballyness Road sometime between 21 and 23 October. The tanks contained a "large quantity" of cattle semen.
- A type of bacterium never seen before in wild elephants has been found in the bodies of six African Savannah elephants that died in mysterious circumstances in Zimbabwe.
