

## A WARM WELCOME TO **ALEXIA LUÍS!**

Drumroll, please! We're thrilled to announce the greenest member of our crew—our freshly minted Junior Environmental Consultant is geared up to turn ideas into eco-revolution. Let the green journey begin.

Alexia will be developing impact assessments together with our senior team of experts and we know she will become an independent consultant very soon.

## SUSTAINABILITY AT YOUR FINGER PRINTS

Our company's new website is now live and buzzing with eco-solutions. Explore the green revolution online as we empower you with knowledge, one click at a time!

## NEW PROJECT

We're proud to announce that BioVision has been appointed by Cimentos de Moçambique to the development of the Landscaping Recovery Plans for five CM and CINAC mining concessions. The project includes mines in Nacala, Dondo and Matola.

Stay tuned on our Linked In page for more exciting news:

## ENVIRONMENTAL AND SOCIAL MANAGE- MENT SYSTEM SUP- PORT AT **EDM**

BioVision is busy with supporting EDM - Electricidade de Moçambique with the implementaion of an Environmental and Social Management System (ESMS) for the organization.

Our team is responsible to ensure that IFC Performance Standards are taken into consideration when implementing the ESMS

### What is energy efficiency?

**It's doing more with less. It's using less energy to get the same job done.**

**It doesn't mean we have to sacrifice or do less; it means we waste less and often gain more. It's a car that uses less fuel to go a mile or a light bulb that uses fewer watts to provide the same amount of light.**

**These products save energy and money.**
